

U-NINA(Premium)

TYPE : Semi-solid Type

USES : For FRP, Marine, Purification tank, General marble Mold

BENEFITS :

- convenient and easy to apply.
- excellent releasing effect.
- get a superior glossy product.
- short time to treatment
- no quality change for a long time using

ADVANTAGES :

- ◆ U-NINA release agent is convenient to using.
- ◆ U-NINA release agent have a good finishing surface because of forming a thin film over a pin hole or crack on mold surface.
- ◆ U-NINA release agent's one application can produce repeatedly, leading to high productivity.
- ◆ U-NINA release agent will endure high FRP mold surface temperature with its high melting point.

Method to apply right :

- All dust or dirt on the mold should be removed and cleaned.
- Though there is a tendency to use a large amount of releasing agents by extending it to a large areas, wiping off or wiping away with a small amount of releasing agents extending to a small area should be conducted repeatedly.
- The releasing agents should sufficiently be applied and rubbed into all of the defects including cracks, pin holes and bores by wiping away.

PACKING : 0.7 kg/tin can or 13 kg/tin can.
